

PRIMA INDUSTRIE

PRIMA INDUSTRIE provides high power CO₂ Nd:YAG and Fiber lasergenerators together with motion systems and controls for manufacturing in the aerospace market. The PRIMA INDUSTRIE systems are a key success factor for cutting, welding and drilling 2D and 3D parts. The solutions in the aerospace field go from engine parts machining like combustors, blades and vanes, compressors and turbine frames to aircraft structures, cases, ducts and pipes, wings and blades skins.
